BODS Data Tool

Sep 21, 2018
A suite of command-line tools for working with BODS data.

It is Python tool that can be used as a library from other Python programmes, or from the command line on your own server.
You can use the tool with the provided CLI script. There are various sub commands.

1. Command line tool - mapping-sheet option

This takes a schema and produces a spreadsheet with all field paths.

```
bodskit mapping-sheet ~/work/openownership-data-standard/schema/person-statement.json
  -> out.csv
```

1.2 Command line tool - schema-report option

Reports details of a JSON Schema (open and closed codelists).

```
bodskit schema-report ~/work/openownership-data-standard/schema/person-statement.json
```
